

Pavan Kusunuri

Senior Software Engineer | React, Node.js, Scalable Systems | API & Performance Optimization

Hyderabad | pavantejakusunuri@gmail.com | +91 83339 44812 | github.com/PavanKusunuri | globalcalqulate.com

Professional Summary

Senior Full Stack Engineer with 6+ years of experience building scalable, high-performance web applications across healthcare, aviation, and media domains. Strong expertise in **React**, **Node.js**, and **Python** with focus on system design and performance optimization.

Core Skills

Frontend: React.js, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, Python, Django REST Framework

Databases: PostgreSQL, MongoDB

Concepts: System Design, REST APIs, Performance Optimization

Tools: Git, GitHub

Professional Experience

ValueLabs — Senior Software Engineer (Feb 2024 – Present)

- Designed and developed financial tracking platforms handling large-scale transactions
- Built scalable REST APIs using **Node.js (Express)** and reusable **React** components
- Improved application performance by optimizing API responses and data handling
- Implemented tracking systems across multiple customers and payment channels
- Identified bottlenecks and enhanced system efficiency through optimized queries
- Mentored junior engineers and improved code quality standards

Impact: Improved system efficiency and reduced latency in high-transaction workflows

Oracle Cerner — Software Engineer (Jan 2022 – Feb 2024)

- Worked on enterprise platform supporting large user base for product updates
- Implemented role-based access control (**RBAC**) for secure access management
- Developed features for license and product management systems
- Investigated and resolved production issues ensuring system reliability
- Collaborated with cross-functional teams for scalable solution delivery

Impact: Enhanced reliability and security for enterprise-scale healthcare systems

AeroSimple Technologies — Software Development Engineer (Dec 2019 – Jan 2022)

- Scaled aviation SaaS platform to support multiple airports
- Implemented **RBAC** to manage secure access across operations
- Standardized frontend architecture using **React**
- Removed legacy UI code improving performance and maintainability
- Optimized backend APIs and reduced unnecessary data transfer
- Improved UI responsiveness and rendering efficiency

Impact: Improved platform performance and maintainability across airport operations

Product Development

GlobalCalqulate — Financial Calculator Platform

- Built and scaled platform with 300+ calculators across multiple countries
- Designed SEO-first architecture for large-scale indexing
- Developed reusable calculation engines for consistent logic
- Optimized performance and ensured fast-loading UI
- Created clean, user-centric interface for financial tools

Impact: Built scalable product foundation for multi-country financial tools

Education

B.Tech — Sri Prakash College of Engineering (2012 – 2016)
